Jose Alvarez

UI/UX Designer — Product Interfaces, Progression Systems & Design Systems

Colombia, LATAM (Remote) | josealvarezswork@gmail.com | odejbyjose.com | linkedin.com/in/alvarezcja | github.com/josealvarezswork

PROFESSIONAL SUMMARY

UI/UX Designer focused on product interfaces built around behaviour — progression systems, XP economies, reward tiers, streaks, fail states, and the design systems that keep them consistent once they ship. Built ESA (Emotional State Architecture), a four-state machine applied across a fintech app, a developer tool and a physical object with its own diegetic interface. Designed a mobile app with a complete UI style guide for iOS and Android, and shipped an agentic AI tool to production. Background in digital content platforms — contributed to growing a YouTube channel from 0 to 34.5K subscribers through consistent visual systems. Currently studying Software Development, which is why my prototypes behave instead of just animating.

SKILLS

Product UI
Mobile and web UI, navigation and information architecture, screen states, onboarding flows, information hierarchy, readability at a glance.

Design Systems & Craft
Figma, UI style guides, components and variants, design tokens, type scales, iconography, color and signaling, motion and feedback.

Systems & Progression
Progression systems, XP economies, reward tiers, leaderboards, streaks and fail states, character state machines, retention metrics.

Tools
After Effects, Blender, Premiere Pro, Notion, Git, HTML/CSS, AI-assisted workflows.

PROFESSIONAL EXPERIENCE

Visual & Motion Designer — 2020 - 2024

Serudda - Digital Content Platform (YouTube · 34.5K subscribers)

- Owned end-to-end UX/UI design for a growing digital content platform, defining visual language, layout systems, and interaction patterns across a multi-year catalog
- Built a complete Figma design system with reusable components, variants, tokens, and auto-export workflows to keep visual output consistent at scale
- Used engagement data to iterate on layout, visual hierarchy, and content structure — contributed to channel growth from 0 to 34.5K subscribers

PRODUCT PROJECTS

UI/UX Designer — 2025

UX Lab OS - uxlab.odejbyjose.com · Oct 2025

- Reduced UX documentation time by 60% by designing a guided discovery flow that turns rough product ideas into structured UX artifacts
- Designed 10+ UX deliverables per project, including briefs, personas, user flows, problem statements, metrics, assumptions, and journey maps

UI/UX Designer — 2026

Cuak · Emotional Fintech - odejbyjose.com/pages/cuak.html

- Designed a reactive fintech character system that translates invisible credit health into four clear emotional states, replacing financial anxiety with actionable clarity
- Defined the behavioral core: real-time character reactions to spending, a credit-level progression system, and advisory moments before risky purchases
- Validated in prototype testing: 5/5 testers reported feeling more in control of their finances

UI/UX Designer — Early 2026

Duo Git - odejbyjose.com/pages/duogit.html

- Designed a behavioral mobile app and widget system that transforms GitHub contribution data into streak-based emotional feedback, targeting 70%+ Day 30 retention
- Defined information architecture, onboarding logic, dashboard views, league ranking, character states, and a full widget family for iOS and Android

EDUCATION

Technical Degree in Software Development (In Progress) - Uniminuto TecMD | 2026 - 2027

UI/UX Design Specialization - California Institute of the Arts (CalArts) | Coursera

Motion Graphics Certification - Coderhouse | 2024
